LANDS.

SINGAPORE.

Land in the hands of private owners in Singapore is held direct from the Crown, either by lease or grant. The terms of the leases vary. A great portion of the land on which the town stands is held on building-leases for 99 years. The terms of the leases in the country are, for the most part, 99 and 999 years. A grant in a Statutory form is now the only Crown title issued. This is prescribed by Ordinance II of 1886.

The "permits" formerly issued in anticipation of survey have all been called in and grants substituted for them. Certain Crown Reserves are held under annual licences. The quit-rent reserved in leases for lands in the country issued before October 15th, 1883, is 30 cents an acre; that on leases issued subsequent to that date varies according to advantages of soil and situation, but is in no case less than 40 cents an acre. In all leases issued since October 15th, 1883, a condition is inserted under which the rent is re-adjustable every thirty years. Since the passing of the Crown Lands Ordinance of 1886, the only instrument of title is a Statutory Grant in perpetuity subject to a minimum quit-rent of 50 cents an acre re-adjustable every thirty years.

By Ordinance I of 1901 special powers are given to the Government with regard to leases of foreshore for periods not exceeding 100 years.

The following tabular statement shows the Revenue derived in Singapore from Land Rents in the years 1918 and 1919, respectively:—

PENANG.

Land in Penang and Province Wellesley is held of the Crown, as in Singapore, by grant or lease. The conditions of tenure vary according to the policy of the Government at the time the documents were issued. In Singapore eighteen and in Penang twenty different kinds of title are in the hands of the public. Unoccupied Crown land is obtainable on Statutory Grants as in Singapore and Statutory Grants are also being substituted for Permits and Expired Leases. Alienation of foreshore is subject to Ordinance I of 1901.

The rates of rent reserved in old leases vary in different localities.

The following table gives a comparative statement of the Revenue derived from Premia and Land Rents in Penang in the years 1918 and 1919, respectively:—

Head of Revenue.	1918.	1919.
	$ c.	$ c.
Lands	159,056 76	160,161 16

MALACCA.

The tenure of land in the town of Malacca has remained unchanged since the days of Dutch rule. Possession is evidenced in many cases by documents of title in Dutch. Occupied land in the country is, in some cases, held either under grant or lease from the Crown, but for the most part according to customary tenure as defined by the Malacca Lands Ordinance. There is special legislation, Ordinance I of 1901, for alienation of foreshore.

Land is now obtainable without premium if held under customary tenure, and with premium and a moderate quit-rent if held under Statutory Grant.

The principal land revenue consists of rents on rubber tapioca and gambier leases and of mukim assessment under customary tenure.

Appended is a comparative statement showing the revenue collected in Malacca in 1918 and 1919, respectively:—

STRAITS SETTLEMENTS.

EDUCATION.

In Colonies containing a large number of Schools, it will be sufficient, if no detailed Return of them already exists, to state full particulars of those only which are Government Institutions, giving the total statistics of the others.

The particulars for each School should show whether it is Denominational, and whether fees are charged.

The number of Scholars should be given, both from the total number on the roll, and from the average attendance during the year.

The totals should indicate the aggregate number of children receiving instruction in the Colony.

Some particulars of the subjects taught in the Higher Schools should be given under the head of Remarks.

RUBBER PLANTING IN PENANG AND PROVINCE WELLESLEY:—In common with the Federated Malay States great interest is being shown in planting Rubber, chiefly the Para variety, although Rambong is planted to some slight extent.

As regards Getah Taban, a tree notoriously slow to mature, and therefore unsuited for private enterprise, the interest shown by Government to restock artificially the Forest Reserves some few years ago is not so great now, owing partly to the fact that vast numbers of young seedlings have been found in the Forest Reserves of the Peninsula, thus showing that there is no fear of its extermination, which some few years ago was feared. Notwithstanding this, however, some 5,000 young trees have been planted in the Forest Reserves, which together with about 4,000 trees known to exist in a wild state, makes a total of 9,000 trees for Penang alone.

Total Weight. * 4.110 tons.	$ 2,659,880	There are no ships or large-sized craft employed in fishing at this Settlement. The native fishermen, who never venture far out, use only canoes and punts. The principal methods of fishing are by drag-nets, and stationary catch-nets, fastened to stakes in deep water. Fishing is carried on solely for the purpose of meeting the demand for local consumption. There is no proper season, but fish are caught throughout the year. On account of the prevalence of the North-east Monsoon, however, from November to March, the markets are less supplied and prices rule higher. From April to October all kinds of fish are plentiful and to be bought at fair prices.

HOSPITALS RETURN.

Question III.—*Concluded.*

(I) In reference to the above Table, state whether or not the Register Books were produced on every occasion; and if not, on how many occasions they were not so produced.	Books were produced on visits of the Principal Civil Medical Officer and Colonial Surgeon.
(II) And if, on any occasion when they were examined, they were found not to be properly made up to date of examination.	Always found up to date.
(III) State also how many Reports of the following kinds have come under the notice of the Governor:—	
(*a*) Reports of a Financial and Statistical kind, especially such as how the system on which Money and Store Accounts are kept and audited.	
(*b*) Reports by persons charged with the immediate management of the Hospital.	Annual, as regards all the Hospitals.
(*c*) Reports by a Government Inspector, independent of the Governing Authority of the Hospital.	
(Append copies of his Reports, if any).	
(I) What quantity of water is available for each Patient every day?	Unlimited at all the Stations.
What is the source of the water supply?	At Singapore, the Hospitals are supplied by a service from the water-works. At the Quarantine Station, St. John's, by a distilling plant supplemented by water boats from Singapore. At the Dindings, from a well in the Hospital Compound. At Penang, the water is conveyed in iron pipes from the hill; at Balik Pulau, water is conveyed in pipes from the hills. At Pulau Jerejak, rain water is collected and conducted by pipes. Water is also pumped from a well into tanks. At Province Wellesley, from wells and hill streams. At Butterworth and Bukit Mertajam, by pipes from reservoir. At Malacca, from the new water-works and also from wells; at Alor Gajah and Jasin, from wells.
What is the quality of the water?	Good at all the Stations.
(II) Detail the arrangements as to Baths and Lavatories.	All the Hospitals are provided with bath-rooms furnished with bath-tubs and tanks. In Tan Tock Seng's Hospital, Singapore, the patients bathe in enclosed bathing-houses, with cisterns to hold water from pipes. At the Quarantine Station at St. John's, and Pulau Jerejak, the people bathe in the sea. At the Dindings, the patients bathe in the open air at a well close to the Hospital. At Malacca, the Native patients bathe at enclosed wells.
(III) What is the system of Sewerage, and what is the condition of the Privies?	At all the Stations, the night-soil is removed twice a day. The privies are in good condition. At the New Quarantine Station, Pulau Jerejak the latrines are flushed automatically every 30 minutes.
